

FutureMart Data Governance Framework

Overview

This document defines the enterprise data governance framework for FutureMart.

The framework establishes policies, standards, roles, responsibilities, security controls, compliance requirements, and data quality practices required to manage data assets across the organization.

The governance model supports FutureMart's unified retail and e-commerce platform following the merger of FashionMart and TrendyThreads.

Section 1: Purpose and Scope

Purpose

The purpose of this Data Governance Plan is to ensure the integrity, security, privacy, quality, and effective use of FutureMart's data assets. The plan establishes policies, standards, and responsibilities for managing data across the organization while supporting business growth, customer satisfaction, regulatory compliance, and data-driven decision-making.

Scope

This plan applies to all data generated, stored, processed, and shared across FutureMart, including:

- Sales and transaction data
- Customer information
- Marketing and campaign data
- Inventory and supply chain data
- Financial and accounting data
- Employee and operational data
- E-commerce platform data
- Analytics and reporting systems

The plan covers all departments, systems, databases, cloud platforms, data warehouses, and business applications used by FutureMart.

Section 2: Data Governance Objectives

Data Quality

Ensure that all business data remains accurate, complete, consistent, timely, and reliable for operational and analytical purposes.

Data Security

Protect customer, employee, and business information from unauthorized access, misuse, theft, and cyber threats.

Data Compliance

Ensure compliance with applicable legal, regulatory, and industry requirements governing data privacy and protection.

Data Availability

Provide authorized users with secure and timely access to data required for business operations and decision-making.

Data Consistency

Maintain standardized definitions, formats, and business rules across all systems and platforms.

Data Usage

Enable data-driven decision-making and business intelligence while ensuring ethical and responsible use of data.

Section 3: Data Governance Framework

Data Governance Steering Committee

The committee oversees governance strategy, compliance, security, and data quality initiatives.

Members:

- CEO (Eleanor Vance) – Executive Sponsor
- CTO (Kenji Tanaka) – Technology Oversight

- CFO (Julian Blackwood) – Financial Data Oversight
- CSO (Devon Hayes) – Security Oversight
- VP of Operations (Ingrid Olsen) – Operational Data Oversight
- VP of Marketing (Jasper Thorne) – Marketing Data Oversight

Data Stewards

Responsible for maintaining data quality, metadata standards, and business rules.

Roles:

- Sales Data Steward
- Customer Data Steward
- Inventory Data Steward
- Marketing Data Steward
- Financial Data Steward

Data Owners

Responsible for approving data usage, access, and retention policies.

Roles:

- VP of Sales – Sales Data Owner
- VP of Marketing – Marketing Data Owner
- VP of Finance – Financial Data Owner
- VP of Operations – Inventory Data Owner

Data Users

Authorized personnel who use data for business purposes.

Examples:

- Data Analysts
- Business Analysts
- Marketing Specialists
- Customer Support Teams

- Finance Teams
- Operations Managers

Data Collection Policy

Customer data shall be collected only through approved business applications and secure channels. Data collection must be transparent, lawful, and limited to business requirements.

Data Usage Policy

Data may only be used for authorized business purposes including sales analysis, customer service, marketing optimization, inventory planning, and reporting.

Data Retention Policy

Data shall be retained according to legal and business requirements and archived or deleted when no longer needed.

Data Privacy and Security Policy

Sensitive data must be protected using encryption, masking, RBAC, MFA, and continuous monitoring controls.

Section 4: Data Management Practices

Data Classification

- Public: Marketing materials and publicly available information
- Internal: Internal operational information
- Confidential: Customer, employee, and financial information
- Restricted: Payment data, authentication credentials, and highly sensitive business information

Data Quality Management

- Automated validation rules
- Duplicate detection
- Data cleansing processes
- Periodic quality audits

- Data quality KPIs

Data Integration

- Standardized ETL/ELT pipelines
- Common data definitions
- API-based integrations
- Master Data Management (MDM) principles

Data Documentation

Maintain:

- Data Dictionary
 - Business Glossary
 - Metadata Repository
 - Data Lineage Documentation
 - ETL Documentation
-

Section 5: Data Security and Privacy Policies

Data Encryption and Masking Policy

- Encrypt sensitive data at rest using AES-256
- Encrypt data in transit using TLS
- Mask payment card and personal information in reports and dashboards

Data Access Control Policy

- Implement Role-Based Access Control (RBAC)
- Apply Principle of Least Privilege
- Use Multi-Factor Authentication (MFA)
- Perform quarterly access reviews

Data Incident Management Policy

- Immediate incident reporting

- Security investigation procedures
 - Root cause analysis
 - Corrective actions
 - Customer notification where required
 - Incident documentation and review
-

Section 6: Compliance and Legal Considerations

Data Regulatory Requirements Policy

FutureMart will comply with:

- GDPR (General Data Protection Regulation)
- PCI DSS (Payment Card Industry Data Security Standard)
- CCPA (California Consumer Privacy Act)
- Applicable national consumer protection regulations
- Data privacy and cybersecurity laws in operating regions

Data Auditing and Reporting Policy

- Annual governance audits
- Quarterly compliance reviews
- Security assessments
- Data quality reporting
- Management compliance reports

Data Retention and Disposal Policy

- Customer transaction data: 7 years
- Financial records: 7 years
- Marketing records: 3 years
- System logs: 1 year

Expired data shall be securely archived or permanently deleted using approved disposal procedures.

Section 7: Data Governance Tools and Technologies

Data Management Systems

- PostgreSQL
- MySQL
- MongoDB
- Data Warehouse Platform

Data Governance Software

- Collibra
- Informatica
- Apache Atlas

Data Monitoring and Reporting Tools

- Power BI
 - Tableau
 - Looker Studio
-

Section 8: Data Governance Training and Awareness

Training Programs

- Mandatory onboarding training
- Annual governance refresher training
- Security awareness training
- Data privacy training

Ongoing Awareness

- Monthly governance newsletters

- Security awareness campaigns
 - Governance workshops
-

Section 9: Performance Metrics and Reporting

Key Performance Indicators (KPIs)

- Data Quality Score
- Number of Data Quality Issues
- Compliance Audit Success Rate
- Number of Security Incidents
- Average Incident Response Time
- Data Availability Percentage

Reporting Structure

- Monthly governance reports
 - Quarterly executive reports
 - Annual compliance reviews
-

Section 10: Implementation Plan

Phase 1 (0–3 Months)

- Establish governance committee
- Define roles and responsibilities
- Create governance policies

Phase 2 (4–6 Months)

- Implement RBAC and MFA
- Launch data quality controls
- Deploy metadata documentation

Phase 3 (7–12 Months)

- Conduct governance audits
- Launch training programs
- Monitor KPIs and compliance metrics

Resources and Budget

- Data Governance Team
- Security Team
- Data Engineers
- Business Stakeholders
- Governance Software Licenses
- Training Budget

Conclusion

This Data Governance Plan provides FutureMart with a structured framework for managing data quality, security, compliance, and accessibility.
